Commentary

The market was short in excess of 1600MW overnight, and short in excess of 1200MW over the darkness peak. Up to 360MW of STOR were used on the evening following the sudden loss a generation unit in Scotland. Interconnectors were traded for margin overnight and during the morning, and for frequency response during the morning peak. Between midnight and the early afternoon BM actions were taken to solve power flow restrictions in Scotland due to planned outages. Overnight, voltage levels in England were managed with BM actions. RocoF was secured with trades undertaken on interconnectors and generating units.
