

Date: Saturday 14 Dec 2019

BSUoS Charge Estimate: £3.16/MWh
Total Outturn: £4.33m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

The market alternated short and long – short mainly overnight and from late afternoon, and between early morning and midday. Wind shortfalled by around 500MW. Some Interconnector Trades for margin between 7am and 8am. From early morning into early afternoon, BM Actions were required to manage thermal export constraints in the North and North West. Overnight Voltage Support assisted with Trades and BM Actions in the Midlands, Wales, and South/South East. Interconnector Trading overnight for System Inertia, with BM Actions in addition during the course of the day.
