

Grid Code Workgroup Consultation Response Proforma

GC0105 - System Incidents Reporting

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses by **5pm on 20 December 2018** to grid.code@nationalgrid.com. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Workgroup.

Any queries on the content of the consultation should be addressed to Matthew Bent at matthew.bent@nationalgrid.com

Respondent:	<i>Joshua Logan</i> Joshua.logan@drax.com 01757 612736
Company Name:	<i>Drax Power Ltd</i>
Please express your views regarding the Workgroup Consultation, including rationale. (Please include any issues, suggestions or queries)	

Standard Workgroup Consultation questions

Q	Question	Response
1	Do you believe that GC0105 Original proposal, the proposed alternative in Annex xx or any potential alternative that you may wish to suggest better facilitates the Grid Code Objectives?	<p>We believe that both the Original and the WAGCM better facilitate the Applicable Grid Code Objectives compared to the baseline. However, we consider that the Original better facilitates the Applicable Grid Code Objectives compared to the WAGCM.</p> <p>Applicable Objective (a) – Positive</p> <p>Reporting data on problems emerging on the network due to changing flows and generation technologies. We prefer the Original as more data will be reported under this option.</p>

		<p>Applicable Objective (b) – Positive</p> <p>Transparency and reporting of incidents could lead to more efficient charging arrangements.</p> <p>Additionally, the Original better facilitates this objective compared to the WAGCM since it makes the report more publicly available, as opposed to only panel members who may be able to give their respective organisations a competitive advantage.</p> <p>Applicable Objective (c) – Positive</p> <p>Reporting and analysing such events should promote system security.</p> <p>Applicable Objective (d) – Neutral</p> <p>Applicable Objective (e) – Positive</p> <p>This report was provided in the past but has never been codified.</p>
2	Do you support the proposed implementation approach?	Yes.
3	Do you have any other comments?	No.
4	Do you wish to raise a WG Consultation Alternative Request for the Workgroup to consider?	No.

Specific GC0105 questions

Q	Question	Response
5	Do you agree that the proposed contents of an annual System Incident report including the associated data on the National Electricity Transmission System (as listed on page 9) includes the necessary items and, if not, are there any items that you would include/exclude/amend?	We agree the original captures all necessary items.
6	Do you agree that such a System Incident report will be a useful report for industry to help	Yes, we agree and support this report being made available to all market participants in order to promote a level playing field.

	improve system resilience?	
7	Do you consider this to be a useful report for your purposes? If yes please provide, where possible, any examples of what you might use it for.	This report would be useful in order to understand operability challenges and significant events throughout the year.
	Legal text comments	
	<i>If you believe there are issues in the legal text, can you please bring these to our attention by using the space provided on the response proforma. These will then be discussed at the next Workgroup, following the closure of this Consultation.</i>
