

Code Administrator Meeting Summary

CMP317 Identification and exclusion of Assets Required for Connection when setting Generator Transmission Network Use of System (TNUoS) charges And CMP327 Removing the Generator Residual from TNUoS Charges

Date: 29 April 2020

Contact Details

Chair: Rob Marshall, National Grid ESO

Rob.Marshall@nationalgrideso.com
07824 518958

Proposer: Jon Wisdom, National Grid ESO

Jon.Wisdom@nationalgrideso.com

Key areas of discussion

The Workgroup discussed the following:

- The workgroup further considered the implications of the P396 decision on what charges should be included in the calculation for annual average transmission charges.
- Particular areas of focus centred on the congestion management element of Balancing Services Use of System Charges (BSUoS). There was an approach with including potential alternatives which include BSC charges. Questions remain in regards to congestion management elements.
- The workgroup considered a paper from RWE Supply and Trading on Congestion costs.
- The workgroup will meet again on 15 May 2020. The Code Administrator has sent a draft version of the Workgroup report for members to review ahead of submission in June 2020.

For further information, please contact the Code Administrator.
