

Code Administrator Meeting Summary

CMP339 – Consequential Changes for CMP317/327

Date: 30 April 2020

Contact Details

Chair: Rob Marshall, National Grid ESO

Rob.Marshall@nationalgrideso.com
07824 518958

Proposer: Jon Wisdom, National Grid ESO

Jon.Wisdom@nationalgrideso.com

Key areas of discussion

The Workgroup discussed the following:

- The workgroup discussed potential consequential changes required as a result of CMP317 and CMP327. The changes will be developed in line with the solutions put forwards as part of that modification.
- The workgroup recognise that modifications are underway in the Balancing and Settlement Code, and the Distribution Connection Use of System Agreement to fulfil The Authority's direction outlined in their TCR SCR decision, and considered whether they had to take into account DCUSA definitions of generator/producer under the Terms of Reference. The workgroups assumption is that definitions within the DCUSA and the BSC are not required.
- The workgroup agreed the consultation questions for this modification. It is hoped that the consultation for this modification will open during the week commencing 11 May 2020.

For further information, please contact the Code Administrator.
