

Code Administrator Meeting Summary

Meeting Name: CMP334 Workgroup 5

Date: 7 May 2020

Contact Details

Chair: Paul Mullen

Contact details: paul.j.mullen@nationalgrideso.com

Proposer: Grahame Neale

Contact details: grahame.neale@nationalgrideso.com

Key areas of discussion

- A respondent to the Workgroup Consultation had proposed that parties who consume demand for the sole purpose of providing response services to the transmission or distribution network should be excluded from paying the Transmission Demand Residual. The National Grid ESO Workgroup Member agreed to take forward this Workgroup Alternative.
- The National Grid ESO Workgroup Member proposed that this Workgroup Alternative be made future proof and argued that “Single Sites” that exist solely to provide Ancillary or Balancing Services that do not require the export of Active Power (as defined in CUSC already i.e. kW, MW, GW etc) to the transmission network are excluded from paying the Transmission Demand Residual.
 - The majority of the Workgroup did not support this as they considered this solution to be too wide and the Chair agreed that this should be part of a separate Modification – therefore this will not be taken forward as part of CMP334; and
 - However, the majority of the Workgroup did support a Workgroup Alternative that excluded those Single Sites that import Active Power from the transmission network solely for voltage support from paying the Transmission Demand Residual. This will now be developed as WACM1.
- Workgroup agreed that Workgroup Vote would take place on 13 May 2020.

Next Steps

Milestone	Date
Code Administrator to issue updated legal text, Workgroup Report, Workgroup Vote and Agenda to Workgroup	12 May 2020 (by 12pm)
Meeting to hold finalise legal text and hold Workgroup Vote	13 May 2020 (3.30pm to 5pm)

For further information, please contact Paul Mullen.
