

## Workgroup Vote – Stage 2

### CMP317 and CMP327: Workgroup Vote

**Please note:** To participate in any votes, Workgroup members need to have attended at least 50% of meetings.

#### Stage 2 - Workgroup Vote

2a) Assess the original and WACMs (if there are any) against the CUSC objectives compared to the baseline (the current CUSC).

2b) If WACMs exist, vote on whether each WACM better facilitates the Applicable CUSC Objectives better than the Original Modification Proposal.

2c) Vote on which of the options is best.

#### The Applicable CUSC Objectives (Charging) are:

- a. That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;
- b. That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);
- c. That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;
- d. Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency. These are defined within the National Grid Electricity Transmission plc Licence under Standard Condition C10, paragraph 1 \*; and
- e. Promoting efficiency in the implementation and administration of the CUSC arrangements.

\*Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).

**Workgroup Vote**

**Stage 2a – Assessment against objectives**

To assess the original and WACMs against the CUSC objectives compared to the baseline (the current CUSC).

You will also be asked to provide a statement to be added to the Workgroup Report alongside your vote to assist the reader in understanding the rationale for your vote.

Y = Yes, N = No, (-) = Neutral

ACO = Applicable CUSC Objective

Workgroup Member	Better facilitates ACO (a)	Better facilitates ACO (b)	Better facilitates ACO (c)	Better facilitates ACO (d)	Better facilitates ACO (e)	Overall (Y/N)

**Voting Statement:**

As the current CUSC cannot ensure compliance with 838/2010 both the original and all the workgroup alternatives offer potentially compliant solutions they are all better than the baseline against objective D.

As the split of revenue between generation and demand is a significant area of uncertainty in TNUoS tariff forecasting any solution that reduces that uncertainty either by removing the need for an error margin or targeting the lower end to the range of the limiting regulation without taking congestion charges into account at the time of tariff setting would aid competition by reducing the uncertainty of the level of charges that parties would face, and so would be better against objective A. As such all alternatives removing the need for an error margin, targeting the lower end to the range of the limiting regulation without taking congestion charges into account at the time of tariff setting or with a phased implementation would be better than the original proposal for competition.

**Stage 2b – WACM Vote (If required)**

Where one or more WACMs exist, does each WACM better facilitate the Applicable CUSC Objectives than the Original Modification Proposal?
