

CUSC Code Administrator Consultation Response Proforma**CMP324/5 Generation Zones – changes for RIIO-T2 and Rezoning – CMP324 expansion**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **5pm on 24 June 2020**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Panel.

If you have any queries on the content of this consultation, please contact Joe Henry joseph.henry2@nationalgrideso.com or cusc.team@nationalgrideso.com.

Respondent details	Please enter your details
Respondent name:	Iain M. Maciver
Company name:	The Stornoway Trust
Email address:	iain.maciver@stornowaytrust.org.uk
Phone number:	01851702002 / 07879476516

For reference the applicable CUSC objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency. These are defined within the National Grid Electricity Transmission plc Licence under Standard Condition C10, paragraph 1 *; and*
- e. *Promoting efficiency in the implementation and administration of the CUSC arrangements.*

**Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).*

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions		
1	Do you believe that the CMP324/5 Original solution, WACM1, WACM2 or WACM3 better facilitates the Applicable CUSC Objectives?	The Stornoway Trust believes that the current arrangements have failed the islands, thereby depriving the nation and the consumer of what island wind generation has to offer.
2	Do you support the proposed implementation approach?	The Stornoway Trust is supportive of any measures which will help to alleviate the high upfront costs and burdensome TNOUS charges island wind generators have to consider. These are factors which are man-made and must be seen as unfair burdens which island developers have to overcome in order to viably compete in a competitive market.
3	Do you have any other comments?	The Stornoway Trust has been patiently playing the waiting game since local wind generation exceeded the capacity our local grid can accommodate. At little or no cost to either the government or the consumer, unlocking the door to island grid connectivity could hugely boost the nation's net zero target aspirations. Effecting change to fall in line with island wind's challenging timetable would undoubtedly help boost the developer confidence and help facilitate a monumental change in our island's economically sustainable future.
