

New CUSC Amendment Proposal: *CAP168: Transmission Access – Under-use and reallocation of TEC*

Please see the attached completed form, which I believe is in the appropriate format and contains the necessary information. We believe the proposal should be accorded urgent status.

Immingham CHP believes the proposal warrants an expedited approach on grounds of its relationship to an imminent date-related event, in this instance Ofgem's stated intention to reach a decision on the outstanding CAPs161-166 possibly in the early summer. It is also relevant that, owing to the inter-relationships between this proposal and CAP161-164, we would wish to see the assessment sufficiently well-advanced so that Ofgem can take initial work into account in carrying out its impact assessment into the live proposals in April.

Please let me know if I can provide anything further.
