Hi Jo

Thank you for flagging your consultation letter. Our previous response enclosed still stands (as below), please consider it in response to the consultation.

“We note that NGESO have calculated the factor at 1.7555 (average of 5 years) and are proposing to round the figure to 1.8000.

We fail to see the logic of this rounding to 2 significant figures given that NGESO publish TNUOS charges up to 8 significant figures elsewhere.

We request that NGESO take forward the 1.7555 number (5 significant figures) in TNUOS calculations.”

Hi Guy,

Hope you are well.

FYI we are running a formal consultation on the value of security factor (currently 1.8), which will be used for RIIQ2.

As you have previously shared your thoughts on this with us (email responding to the September TCMF slides), just checking if you want us to include the previous email as your response to this consultation, or would you like to send in a refreshed response (to the open letter)?

Thanks,
Jo

TNUoS Locational Onshore Security Factor for RIIO2 Period: Your feedback sought

Hello,

We would like to consult on the approach to finalise the TNUoS Locational Onshore Security Factor, to be applied to the TNUoS tariffs over the RIIO-2 period (2021/22 – 2025/26). Please follow the link below to read the consultation letter for more details.

We appreciate any feedback you may have on the approaches described in the consultation letter. Please send your feedback via TNUoS.queries@nationalgrideso.com by **4th December 2020**.

Many thanks

The TNUoS team
