- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency; and*
- e. *Promoting efficiency in the implementation and administration of the CUSC arrangements.*

Standard Workgroup Consultation questions		
1	Do you believe that the CMP344 Original Proposal better facilitates the Applicable Objectives?	We concur with the Proposer. In our view the clarification of Transmission Licensee revenue recovery and the treatment of revenue adjustments in the Charging Methodology will better facilitate Applicable Objectives (a), (b) and (e) whilst being neutral in terms of (c) and (d) for the reasons the Proposer has detailed in the proposal itself (and as set out in the consultation document). For the sake of brevity, we refrain from repeating that rationale here.
2	Do you support the proposed implementation approach?	Yes, we support the proposed implementation approach.
3	Do you have any other comments?	Not at this time.
4	Do you wish to raise a Workgroup Consultation Alternative Request for the Workgroup to consider?	No.
