

CUSC Workgroup Consultation Response Proforma**CMP357 'To improve the accuracy of the TNUoS Locational Onshore Security Factor for the RIIO2 Period'**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **5pm on 8 January 2021**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Workgroup.

If you have any queries on the content of this consultation, please contact paul.j.mullen@nationalgrideso.com or cusc.team@nationalgrideso.com.

Respondent details	Please enter your details
Respondent name:	Joseph Dunn
Company name:	ScottishPower Renewables
Email address:	Joseph.dunn@scottishpower.com
Phone number:	07753 624 494

For reference the applicable CUSC (charging) objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency; and*
- e. *Promoting efficiency in the implementation and administration of the system charging methodology.*

**Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).*

Please express your views regarding the Workgroup Consultation in the right-hand side of the table below, including your rationale.

CMP357 - Standard Workgroup Consultation questions		
1	Do you believe that the CMP357 Original Proposal or the potential alternative options better facilitates the Applicable Objectives?	<p>I believe the original proposal improves the accuracy of the tariffs the proposal improves competition (ACO a) and by default will improve the cost-reflectivity (ACO b) of the value of the security factor.</p> <p>My assessment above is against the baseline which NGENSO have proposed as 'to 1dp and then to move to 2dps'. Therefore I do not believe either of the alternatives better facilitate the ACOs.</p>
2	Do you support the proposed implementation approach for CMP357?	<p>Yes</p> <p>I would not be supportive of any of the potential alternative implementation dates discussed in the WG consultation.</p>
3	Do you have any other comments?	No
4	Do you wish to raise a Workgroup Consultation Alternative Request for the Workgroup to consider?	No
Specific Workgroup Consultation Questions		
5	Do you have any further analysis/evidence to support your conclusions under Question 1?	No. However, the NGENSO open letter justified the improved accuracy of the increased decimal places
6	Will the CMP357 Original Proposal or the potential alternative options impact on your business. If so, how?	No impact.
