

Workgroup Consultation Response Proforma**CMP373 'Deferral of BSUoS billing error adjustment'**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **12pm on 4 May 2021**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Workgroup.

If you have any queries on the content of this consultation, please contact Paul Mullen paul.j.mullen@nationalgrideso.com or cusc.team@nationalgrideso.com

Respondent details	Please enter your details
Respondent name:	Kit Dixon
Company name:	Good Energy
Email address:	Kit.dixon@goodenergy.co.uk
Phone number:	07846923315

I wish my response to be:

(Please mark the relevant box)

 Non-Confidential Confidential

Note: A confidential response will be disclosed to the Authority in full but, unless agreed otherwise, will not be shared with the Panel, the Workgroup or the industry and may therefore not influence the debate to the same extent as a non-confidential response.

For reference the Applicable CUSC (charging) Objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency; and*
- e. *Promoting efficiency in the implementation and administration of the system charging methodology.*

**Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).*

Please express your views regarding the Workgroup Consultation in the right-hand side of the table below, including your rationale.

Standard Workgroup Consultation questions		
1	Do you believe that the CMP373 Original Proposal better facilitates the Applicable Objectives?	Yes
2	Do you support the proposed implementation approach?	Yes, in that it is preferable to the approach proposed by ESO.
3	Do you have any other comments?	No
4	Do you wish to raise a Workgroup Consultation Alternative Request for the Workgroup to consider?	No
Modification Specific Workgroup Consultation questions		
5	Do you believe that it is more appropriate to recover the £33,163,790.21 of trading costs in the FY 2021/2022 Settlement Final (SF) Run? Please provide the rationale for your response?	Yes, this gives parties more time to prepare for the costs and will allow suppliers to recover costs should the choose to/be able to do so.
6	Do you think that it is more important to socialise the costs across users in FY 2021/2022 or to correctly target the liable users when the costs were incurred using the RF run? If not socialised do you	The costs should be socialised. Not only so that the costs will be accounted for in the tariff cap methodology, but also because the proposed way of targeting the liable users is not guaranteed of success for the reasons set out in the consultation document. The additional complexity of adding manual billing processes for ESO increases the risk that there will be further errors.

	have a proposal for how the Default Tariff Cap calculations would work? Please provide the rationale for your response.	
7	Do you believe that the costs should be recovered from 1 October 2021 to 31 March 2022 (as per Original proposal) or 1 June 2021 to 31 March 2022 or using the default of the RF runs? Please provide the rationale for your response.	Yes, the costs should be recovered between 1/10/21 and 31/03/22. This gives suppliers the opportunity to recover some of the costs should they be able/wish to do so, compared with both the ESO's original proposal and the proposer's alternative approach of recovering costs from 1/06/21.
8	Will the CMP373 Original Proposal or any of the potential alternative solutions impact your business and/or end consumers. If so, how?	Please see answer to question 7.
