CMP368

Changes to Section 11 of the CUSC as follows (the changes are shown in **red text**):

WACM 19

“GB Generation Output”: that being export **BM Unit Metered Volumes** in the relevant charging year of GB generation liable for the TNUoS generation charge, plus the associated export volumes (MWh) relating to TNUoS generation charge-liable Embedded Generators.

“Forecast TNUoS Charges payable by Generators”: total forecast TNUoS charges to be recovered from Generators in the charging year, including TNUoS charges in respect of **Station Demand**, minus **Charges for Physical Assets Required for Connection** but including TNUoS Charges payable by TNUoS-liable Embedded Generators.

Actual Transmission Generator TNUoS Charges”: Actual TNUoS charges to Generators in the previous charging year, including TNUoS charges in respect of **Station Demand**, minus **Charges for Physical Assets Required for Connection** but including TNUoS Charges payable by TNUoS-liable Embedded Generators.
