

CMP252 – Housekeeping changes to CMP235/CMP236 legal text'

CUSC Panel – 28 July 2015
Damian Clough – National Grid

Background

- Ofgem published its decision on Connection and Use of System Code (CUSC): ‘Introduction of a new Relevant Interruption Type’ (CMP235) and ‘Clarification of when Disconnection Compensation payments can be expected under a Relevant Interruption’ (CMP236)
July 15th 2015
- Implementation **25th July 2015**

Summary of Defect

- Following Implementation, it was noted that there were some typographical errors in the legal text associated with the Workgroup Alternative implemented (WACM3)
- A customer has raised concerns that these errors may prevent future Interruption Payments
- Therefore to allay concerns, we felt it appropriate to deal with these errors as soon as possible through the appropriate modifications process

Summary of Defect (future)

- There are also some grey areas which may need further clarification within the legal text. However these changes did not meet the criteria of Fast Track, so therefore will be dealt with via a further modification(s) later in the year (possibly next month)

Proposed CUSC Modification

- This Proposal seeks to amend;
 - CUSC Section 11 – The Statement of the Balancing Services Use of System Charging Methodology
- These are typographical changes and therefore have no material impact on Users

Justification against Self Governance & Fast Track criteria

 - iv. Matters relating to sustainable development, safety or security of supply, or the management of market or network emergencies; and*
 - v. The CUSC's governance procedures or the CUSC's modification procedures, and*
- (b) Is unlikely to discriminate between different classes of CUSC Parties.*

Justification against Self Governance & Fast Track criteria

 - (d) *Updating out of date references to other documents or paragraphs.*
