

CUSC Modifications Panel Meeting

Headline Report

Meeting Name:	Special CUSC Modifications Panel Meeting
Meeting No:	196
Date of Meeting:	25 October 2016
Venue:	National Grid House, Warwick

Any Questions?

Contact:
Ryan Place
 CUSC Panel Secretary

1 Introduction

Welcome to the CUSC Panel Headline Report. This shall be produced after every CUSC Panel meeting and aims to provide all of our key stakeholders / interested parties with an overview of the headlines and key decisions the Panel are currently managing. Full minutes of the meeting will be produced and approved at the next meeting of the CUSC Panel and will then be published on the website.

All presentations given at this Modifications Panel meeting can be found in the Modifications Panel area on the National Grid website¹

We would welcome any comments you may have.

2 Workgroup Reports

There were two Workgroup Reports presented to the CUSC Panel at this meeting.

CMP264/265/269/270 'Embedded Generation Triad Avoidance Standstill', Gross Charging of TNUoS for HH demand where embedded Generation is in the Capacity Market', Potential Consequential changes to the CUSC as a result of CMP264', and 'Potential consequential changes to the CUSC as a result of CMP265'.

CMP264 seeks to make changes to the Transport and Tariff Model and billing arrangements to remove the netting of output from New Embedded Generators until Ofgem has completed its consideration of the current electricity transmission Charging Arrangements (and any review which ensues) and any resulting changes have been fully implemented. CMP265 specifically seeks to address the issue that half hourly metered (HH) demand for TNUoS purposes is currently charged net of embedded generation. CMP269 and CMP270 both seek to address a number of consequential changes required to non-charging sections of the CUSC to reflect the CMP264 and CMP265 Proposals.

The Panel reviewed the Workgroup Report and agreed that it should proceed to Code Administration Consultation.

CMP261 'Ensuring the TNUoS paid by Generators in GB in Charging Year 2015/16 is in compliance with the €2.5/MWh annual average limit set in EU Regulation 838/2010 Part B (3)'

CMP261 seeks to ensure that there is an ex post reconciliation of the TNUoS paid by GB Generators during charging year 2015/16 which will take place in Spring 2016 with any amount in excess of the €2.5/MWh upper limit being paid back, via a negative Generator residual levied on all GB Generators who have paid TNUoS during the period 1st April 2015 to 31st March 2016 inclusive.

The Panel reviewed the Workgroup Report and agreed that it should proceed to Code Administration Consultation.

3 Next Meeting

The next CUSC Panel meeting will take place 28 October 2016 at National Grid House, Warwick and the next Special Panel meeting will take place on 15 November 2016 to discuss CMP267 and CMP268.
