

1. BSC Modification Proposals impacting on the Grid Code

Ref No	Description	Impact on Grid Code	Status
P77	Multiple BM Units for Interconnector Users	No changes to the Grid Code identified from proposed legal drafting.	Assessment report sent to BSC Panel on 18/7/02 and an Implementation date agreed as 10/12/02
P80	Deemed BOA for Transmission System faults	Likely to require changes to BC2.	Assessment report due to BSC Panel on 17/10/02.
P87	Removal of market risk associated with operation of a Generator intertrip scheme.	Likely to require change to BC2.5.2.3	Assessment report due to BSC Panel on 12/09/02.

2. CUSC Amendment Proposals impacting on the Grid Code

CAP002	CUSC 6.5.1 clarification	Changes to PC and, OC1 to ensure NO provides appropriate data.	CUSC Amendment Report with Ofgem. Grid Code Consultation Paper issued.
CAP010	Frequency Response Imbalance Exposure	May require some additions to BC2.	Identical in effect to P36. CUSC Amendment Report with Ofgem.
	Definition and use of MEC and Registered Capacity.	A definition of MEC in the Grid Code has been suggested by Innogy.	A CUSC Amendment is to be proposed. This is to be developed as one of the prerequisites for Transmission Access.
