

Code Administrator Consultation Response Proforma**CMP288: Explicit charging arrangements for customer delays and backfeeds**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **5pm on 18 July 2022**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration.

If you have any queries on the content of this consultation, please contact Jennifer Groome Jennifer.Groome@nationalgrideso.com or cusc.team@nationalgrideso.com

Respondent details	Please enter your details
Respondent name:	Michelle MacDonald
Company name:	Scottish Hydro Electric Transmission (SHET)
Email address:	Michelle.macdonald@sse.com
Phone number:	01738 342183

I wish my response to be:

(Please mark the relevant box)

☒ Non-Confidential☐ Confidential

Note: A confidential response will be disclosed to the Authority in full but, unless agreed otherwise, will not be shared with the Panel or the industry and may therefore not influence the debate to the same extent as a non-confidential response.

For reference the Applicable CUSC (charging) Objectives are:

- That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency *; and*

- e. *Promoting efficiency in the implementation and administration of the system charging methodology.*

***The Electricity Regulation referred to in objective (d) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.*

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions		
1	Do you believe that the Original Proposal better facilitates the Applicable Objectives?	<p>Mark the Objectives which you believe Original solution better facilitates:</p> <p>Original <input type="checkbox"/>A <input checked="" type="checkbox"/>B <input type="checkbox"/>C <input type="checkbox"/>D <input checked="" type="checkbox"/>E</p> <p>We believe this modification better facilitates applicable objectives B and E (A, C and D are neutral). This modification ultimately improves transparency of costs.</p> <p>Objective A – Neutral.</p> <p>Objective B – Positive. Charging the direct user who's created the additional costs, rather than being subsidised by other CUSC parties.</p> <p>Objective C – Neutral.</p> <p>Objective D – Neutral.</p> <p>Objective E – Positive. Ensures charge is recovered by the direct party who created the additional costs.</p>
2	Do you support the proposed implementation approach?	<p><input checked="" type="checkbox"/>Yes <input type="checkbox"/>No</p> <p>SHET is supportive of the implementation following decision from the Authority.</p>
3	Do you have any other comments?	SHET is committed to ensuring there is effective stakeholder engagement to mitigate any circumstance where the User has any delays to their project to reduce the likelihood of any charges being incurred, however where delays by the User has a financial impact on the TO, this cost should be borne by the User involved rather than being socialised.
