

## Headline Report – 26 October 2022

### System Operator Transmission Owner Code (STC) Panel

The STC Panel Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

### Approval of Panel Minutes

---

The meeting minutes from the Panel on 28 September 2022 were approved and these will be uploaded to our website.

### New Modifications

---

The following new Modification Proposals were presented to the Panel:

#### **PM0126 'Transmission Impact Assessment Process in relation to CMP298 and CM080'**

PM0126 seeks to facilitate an aggregated assessment that mitigates the need to assess individual smaller connections making it easier for all parties to get an accurate view of any works required.

Panel approved the STCP changes '**in principle**' and agreed that it will only be implemented following a positive decision from the Authority on CMP298 and CM080. Once the Authority have decided, Panel will have to formally approve this STCP change.

#### **PM0128 'Implementation of the Electricity System Restoration Standard in relation to GC0156'**

**PM0128** is seeking to make a number of changes to the System Operator Transmission Owner Code to facilitate Special Condition 2.2 of National Grid's Electricity System Operator's Transmission Licence.

This modification was presented as a Draft modification to Panel and will be formally raised at the November 2022 Panel.

**PM0124 ‘Enduring Expansion Constant & Expansion Factor Review Overview to CMP315/375’**

**PM0124** seeks to revise data requirements set out in the STC and facilitate changes arising from CUSC modifications CMP315 and CMP375 which amend the calculation of the Expansion Constant & Expansion factors to better reflect the growth of and investment in the National Electricity Transmission System (NETS)

This modification was presented as a Draft modification to Panel and will be formally raised at Panel once the CMP315/375 solution is sufficiently developed.

**New / Pending Authority Decisions**

Ofgem provided an update on Modifications that are awaiting their decision or have been decided upon since the last STC Panel on 28 September 2022.

**Decisions since last STC Panel**

There are no Ofgem decisions on STC Modifications since the last STC Panel.

**Awaiting Decisions**

The STC position is summarised below:

Modification	What this seeks to achieve	Expected Decision Date
<b>CM078</b>	Seeks to make changes to the System Operator Transmission Owner Code to reflect CUSC modification CMP328 relating to Transmission connections that trigger an impact assessment on the Distribution network.	30 November 2022, which is at the same time as the associated CUSC Modification (CMP328).

Ofgem publish a table that provides the expected decision date, or date they intend to publish an impact assessment or consultation, for code modifications/proposals that are with them for decision. This was last updated on 14 October 2022 and is published [here](#).

**In flight Modifications**

The next Modification Tracker will be published on 07 November 2022.

**Workgroup Reports**

The following Workgroup Report was presented to the Panel.

**CM084 ‘Clarify STCP Modification approach on Cross Code Impacts’**

CM084 seeks to amend the governance rules to be more prescriptive of the interactions and timings for STC Panel to better consider STCP changes stemming from cross code modifications

---

The Panel unanimously agreed that CM084 has met its Terms of Reference and should proceed to Code Administrator Consultation.

---

**Draft Final Modification Reports**

---

---

**Questions or feedback?**

---

**Code Administrator Representative:** Sally Musaka, *Code Administrator*

**Panel Secretary:** Rashpal Gata-Aura, *Code Administrator*
