Key areas of discussion

- The Chair took the Workgroup through the timeline for the modification.
- The Proposer gave a presentation on considerations of the solution options discussed at the first Workgroup meeting. These options were:
 - As Original, but fixed for the length of the price control.
 - An average of the zonal prices for each DNO zone
 - Use the nodal price
- The Proposer confirmed that their original solution would be updated to incorporate the above elements.
- Quantitative Analysis on the differences at zone boundaries was presented to the Workgroup.
- The Workgroup discussed if the solution should also include IDNO's, as they will have connection agreements with the TO and are also Transmission Connected. It was agreed that IDNO's should be included in the CMP379 solution.
- The Chair noted the following actions taken at the meeting, which are summarised in the table below.
