

CUSC Code Administrator Consultation Response Proforma**CMP344 'Clarification of Transmission Licensee revenue recovery and the treatment of revenue adjustments in the Charging Methodology'**

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **5pm** on **22 December 2020**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration by the Panel.

If you have any queries on the content of this consultation, please contact Joseph Henry Joseph.Henry2@nationalgrideso.com or cusc.team@nationalgrideso.com.

Respondent details	Please enter your details
Respondent name:	Garth Graham
Company name:	SSE Generation
Email address:	garth.graham@sse.com
Phone number:	01738 456000

For reference the applicable CUSC objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*
- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency. These are defined within the National Grid Electricity Transmission plc Licence under Standard Condition C10, paragraph 1*; and*
- e. *Promoting efficiency in the implementation and administration of the use of system charging methodology.*

**Objective (d) refers specifically to European Regulation 2009/714/EC. Reference to the Agency is to the Agency for the Cooperation of Energy Regulators (ACER).*

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions		
1	Do you believe that the CMP344 Original solution, better facilitates the Applicable CUSC Objectives?	<p>Yes, we believe that CMP344 Original does, overall, better facilitates Applicable Objectives (a), (b) and (e) whilst being neutral in terms of (c) and (d).</p> <p>This is because the proposal ensures the CUSC takes into account the situation in terms of the Offshore and Onshore arrangements as regards unexpected and unforeseen (as well as unforeseeable) events.</p> <p>By doing this it ensures that competition in the generation of electricity is better facilitated whilst also enabling cost reflective tariffs to be better facilitated and, furthermore, that the implementation and administration of the CUSC is more efficiently facilitated.</p>
2	Do you support the proposed implementation approach?	Yes, we support the proposed implementation approach.
3	Do you have any other comments?	Nothing further at this time.
