

Code Administrator Meeting Summary

Meeting name: CMP405 TNUoS Locational Demand Signals for Storage – Workgroup meeting 2

Date: 16/02/2023

Contact Details

Chair: Jess Rivalland, National Grid ESO Jess.Rivalland@nationalgrideso.com

Proposer: Damian Clough SSE Generation Damian.Clough@sse.com

Key areas of discussion

Objective

The aim of Workgroup 2 was to consider what additional analysis is required to move forward with the Proposal.

ESO data presentation

The Proposer had requested analysis from ESO in Workgroup 1. This was presented to the Workgroup by the ESO Representative (AP). The presentation examined Battery and Pump storage data across GB in 2022.

The analysis in the presentation covered Self Dispatch Behaviour, Bid Acceptance Data and Bid Pricing Data. It was made clear by the AP that ESO understood limitations and constraints surrounding the data analysis and welcomed suggestions from Workgroup members for more targeted data requests.

DJ expressed concern about the amount of knowledge and available data ESO has with regards to storage capabilities and made an insight request to ESO. He suggested that if ESO did have better visibility how would this affect their behaviour.

The Proposer (DC) confirmed he would continue to see external consultancy support prior to the next Workgroup. It was indicated that what has happened in the past may not necessarily reflect what will happen in the future.

Next Steps

Workgroup members were asked to consider any additional requests for targeted analysis by ESO and to put this to AP by email.

Actions

Action number	Workgroup Raised	Owner	Action	Due by	Status
2	WG1	ALL	Workgroup to consider what additional analysis is required for the consultants that has not yet been extracted	24/02/2023	Open
4	WG1	DC	Consider timeline for external consultants	24/02/2023	Open
5	WG1	AP/RDL	ESO to request initial historical data from ESO ENCC	16/02/2023	Closed
6	WG2	AP	To gain insight / view from the ESO control room as to whether they would make more use of bidding storage facilities to import if they had accurate visibility of actual storage capacity remaining.	WG3	Open

Attendees

Name	Initial	Company	Role
Jess Rivalland	JR	National Grid ESO	Chair
Andrew Hemus	AH	National Grid ESO	Technical secretary
Damian Clough	DC	SSE Generation	Proposer
Alison Price	AP	National Grid ESO	Workgroup Member
Claire Goult	CG	National Grid ESO	Observer
Damien Jackman	DJ	Field	Workgroup Member
John Prime	JP	ENERGYGRIDPOWER Ltd	Workgroup Member
Kate Livesey	KL	Drax	Workgroup Member
Priyanka Mohapatra	PM	Scottish Power	Workgroup Member
Rein De Loor	RDL	National Grid ESO	Workgroup Alternate
Rob Newton	RN	Zenobe	Workgroup Member
Simon Vicary	SV	EDF	Workgroup Alternate
Tom Palmer	TP	Zenobe	Workgroup Member
