# Terms of Reference Review

All

## Workgroup Term of Reference

- a) Consider EBR implications
- b) Consider the length of time the TNUoS Generation tariffs are fixed for
- c) The proposal is for wider generation tariffs to be within the pre-defined cap/collar range for each generation zone and charging year. Consider the requirement for a cap and collar and consider what the pre-defined range should be?
- d) Consider whether criteria need to be set to allow for the cap and collar to be waived in certain circumstances (e.g. for material changes to the TNUoS methodology)
- e) Consider the interaction between the cap/floor as set by 838/2010 ("Limiting Regulation") and the cap/collar as proposed by the modification.
- f) Consider the impact on demand TNUoS tariffs as a result of net the difference in revenue from the adjustment made to TNUoS Generation tariffs (if it breaches the pre-defined cap/collar range).
- g) Consider the impact on the Transmission Demand Residual and consumers.
- h) Consider interactions with wider potential TNUoS developments e.g., TNUoS Taskforce and Review of Electricity Market Arrangements (REMA).
- i) Consider the trade-off between cost-reflectivity and certainty/predictability.
