Commentary

A mostly short market with brief long peaks over the early morning and mid afternoon. Between 9.45am and 10.45am around 150MW of STOR was run. Interconnector Trades for Margin required between 4pm and 5pm. Some BM Actions required to manage thermal export constraints in the South East in the early evening. Trades and BM Actions supported Voltage Control overnight for the South/South East, Midlands, and Wales areas. Trades and BM Actions for RoCoF throughout the day.
