BSUoS Charge Estimate: £3.74/MWh
Total Outturn: £4.50m

Daily Balancing Costs

nationalgridESO

BM Cost (Indicative)
AS Cost (Estimate)

Commentary

The market was long until 7:30am and was mostly short for the remainder of the day. Trades were made for downwards regulation in the early morning.

Trades and BM Actions were used for RoCoF. A combination of an optional contract enactment, trades and BM actions were required for voltage management.
