## Commentary

The market was mostly long through the day but with a sustained short position between 8:30am and 1:30pm. Approximately 200MWs of STOR was run at 8:30am and 10:15am.

A small number of BM Actions were required to relieve thermal constraints in the north of Scotland during the early morning. Trades on interconnectors were carried out to manage RoCoF. For voltage management, all units ran at PN.
