BSUoS Charge Estimate: £1.98/MWh
Total Outturn: £1.90m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

Demand was unpredictable during the morning and it was challenging to find a suitable profile day. Trades were made for margin. The evening peak demand outturned 500MW higher than estimates and 200MW of small BMUs were utilised.

BM Actions were used to reduce congestion in the Midlands and North England. Interconnector trades were carried out for RoCoF and South East export constraint. BM Actions and trades were needed for voltage support.
