## Commentary

A short market between the early hours until midday. Interconnector Trades were required for Margin during the morning and for Response throughout the day. Trades managed thermal import constraints along the South Coast of England during the evening, and in the South East of England from the morning onwards into the late night. BM Action alleviated thermal export constraints in Scotland at the start of the day, and in the North of England in the late afternoon. Overnight Voltage Control supported by Trades in the Midlands.
