**Total Outturn: £3.85m**

# Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

**Western Link status: Available**

## Commentary

The market was short over the early morning and midday, and short from evening onwards into the night. Interconnector Trades were required for Margin between 7am and 8am. South East import constraints required Interconnector Trades to alleviate briefly during the morning, afternoon and evening. BM Actions alleviated thermal export constraints in Scotland late afternoon to early evening. Overnight Voltage Control supported by Trades and BM Actions. Some BM Action for System Inertia during the day.
