

Date: **Thursday 20 Aug 2020**

BSUoS Charge Estimate: £5.94/MWh
Total Outturn: £6.39m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

The market position varied through the day with wind volatility due to Storm Ellen. Up to 490MW of small BMUs were used in the morning peak. Trades were made for margin through the morning and evening peak.

Constraints were active across Scotland and the English border for most of the day. Overnight trades were made for RoCoF. A combination of trades and BM Actions were used for voltage control.
