

Date: **Monday 24 Aug 2020**

BSUoS Charge Estimate: £2.22/MWh
Total Outturn: £2.28m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

The market position stayed long for most of the day. Wind generation was above forecast during the morning ramp and demand was lower than forecast. Wind continued to stay high through the day and increased to up to 800MW above forecast at times in the evening.

Interconnector trades were made to manage constraints in the south east of England. Trades were required to manage RoCoF risk. A combination of trades and BM Actions were used for voltage control.
