**Total Outturn: £1.45m**

# Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

**Western Link status: Available**

## Commentary

The market was long for the majority of the day. Wind generation out turned slightly above forecast. Additional BMUs were run as a defensive measure against lightning.

BM Actions were taken for constraint purposes in the north of Scotland. Trades were carried out for RoCoF. There was a good disposition of plant which covered all the required voltage support.
