

Date: **Saturday 22 Aug 2020**

BSUoS Charge Estimate: £7.93/MWh
Total Outturn: £7.54m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Western Link status: Available

Commentary

The market was short in excess of 1600MW in the evening. Multiple trades on the interconnectors were required until the afternoon for downward regulation. Additional dynamic response was required in the late evening due to wind volatility. In order to mitigate the RoCoF risk, a large volume of BM actions were undertaken for most of the day together with multiple trades on the interconnectors. Overnight, trades were taken to solve network constraints in Scotland and to manage the voltage levels in England.
