

Date: **Saturday 28 Aug 2021**

BSUoS Charge Estimate: £5.64/MWh
Total Outturn: £5.39m

Daily Balancing Costs

■ BM Cost (Indicative)
 ■ AS Cost (Estimate)

Commentary

The market was mostly long over the early morning to midday, becoming short intermittently in the afternoon, and short over the late evening into the night. Overnight Trades and BM Action required for Voltage Control in the Midlands and Wales areas. Interconnector Trades throughout the day and overnight for RoCoF. BM Action was required over the early morning to manage thermal import constraints in Scotland.
