Commentary

In the morning there were periods of short market in excess of 400MW. For most of the day multiple trades on the interconnectors were taken for positive margin. Throughout the 24 hours multiple trades on the interconnectors were undertaken to mitigate the import power flow constraint in the South East of England. From the morning pick-up a large volume of wind generation was bought off in the BM to solve the power flow restrictions in Scotland due to sustained high wind level. BM Actions were also taken to solve power flow restrictions in the south of England.
