

Date: Friday 12 Aug 2022

BSUoS Charge Estimate: £7.10/MWh
Total Outturn: £7.55m

Daily Balancing Costs

BM Cost (Indicative)
AS Cost (Estimate)

Commentary

The market was intermittently short in excess of 500MW between midnight and midday. Then it was short in excess of 1200MW from the afternoon until the end of the day. Throughout the 24 hours multiple trades on the interconnectors were undertaken for positive margin. Some BM actions were taken between midnight and the early afternoon to buy off wind generation to solve power flow congestions in Scotland and in the South East of England.
