

Date: **Thursday 01 Oct 2020**

BSUoS Charge Estimate: £1.98/MWh
Total Outturn: £2.32m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Commentary

The market was mostly long all day. In the morning, interconnector transfer rates dropped by up to 1000MW and approximately 100MW of Small BMUs were run in merit. Wind generation was 350MW above forecast during the afternoon with demand outturn below forecast. Up to 760MW of Small BMUs were run over the afternoon peak. Overnight interconnector trades were made for downwards regulation.

Trades were made for RoCoF. A combination of optional contract enactment, trades and BM actions were taken to support the voltage requirement.
