BSUoS Charge Estimate: £5.43/MWh  
Total Outturn: £8.07m

# Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Western Link status: Available

## Commentary

The market started long and switched to a short position for most of the daylight hours. Demand estimates were uncertain for the afternoon and early evening. Small BMUs were used and trades were made for margin.

Contraints were active in Scotland and northern England for much of the day with high winds. Trades were needed for RoCoF. An optional contract enactment, trades and BM actions were required for voltage control.
