

Date: Thursday 30 Dec 2021

BSUoS Charge Estimate: £11.49/MWh
Total Outturn: £13.96m

BM Cost (Indicative)
AS Cost (Estimate)

Daily Balancing Costs

Commentary

Period of short market in excess of 800MW were recorded between the afternoon and the evening. Multiple trades on the interconnectors were undertaken between midnight and the morning pick-up for downward regulation. Large volume of BM actions were in place from the previous day until the mid-afternoon, to solve power flow congestion on the England-Scotland network boundary, due to high wind level. Overnight, the voltage levels in England were managed with a mix of trades on generating units and BM actions. BM actions were also taken to mitigate the RoCoF risk
