**Total Outturn: £3.46m**

# Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

**Western Link status: Available**

## Commentary

The market position alternated through the day. Trades were made for margin during the morning and small BMUs were also used.

Thermal constraints were active in Scotland from mid-afternoon into the evening with wind above forecasted. Overnight trades were carried out for RoCoF. An optional contract enactment, trades and BM actions were needed for voltage management.
