BSUoS Charge Estimate: £2.33/MWh
Total Outturn: £3.28m

Daily Balancing Costs

■ BM Cost (Indicative)

■ AS Cost (Estimate)

Commentary

The market position alternated through the morning and remained mostly short afterwards. BM Actions were taken for margin during the evening.

Constraints were active in Scotland during the early morning. Overnight interconnector trades were made for RoCoF. Trades and BM Actions were needed for voltage support.
