

Date: **Tuesday 14 Feb 2023**
BSUoS Charge Estimate: £5.49/MWh
Total Outturn: £7.28m

Daily Balancing Costs

■ BM Cost (Indicative)
 ■ AS Cost (Estimate)

Commentary
 The market remained mostly short throughout the day, there was a brief period around in the early morning and early afternoon where the market went long. Trades were required for Margin in the mid morning and late night. Stability export constraints were active in Wales throughout the morning and early afternoon. BM Actions managed thermal export constraints in Scotland in the late night. All Voltage and System Inertia requirements were met by the market.
