

Date: **Tuesday 28 Feb 2023**

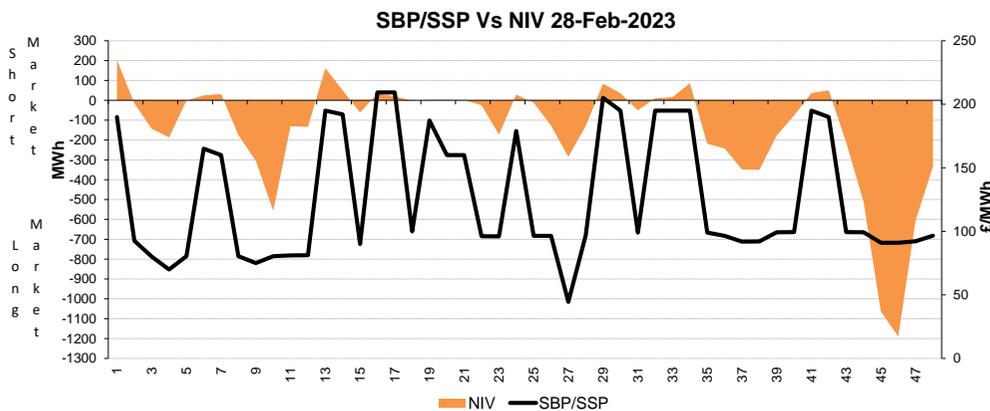

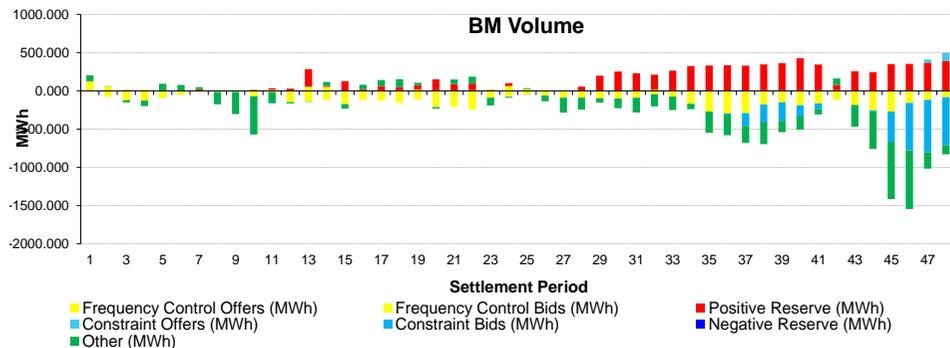

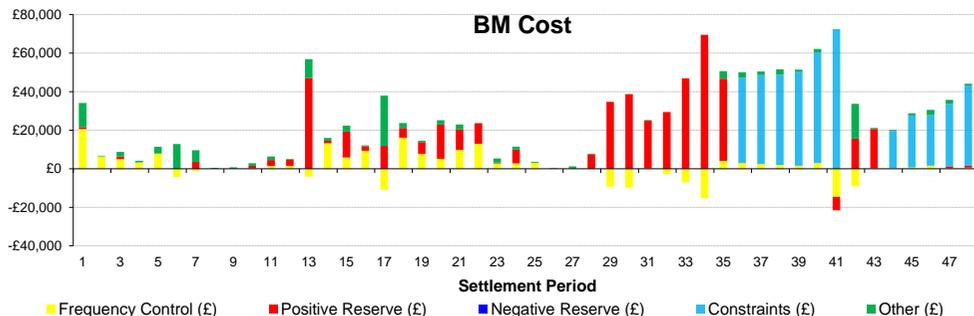

**BSUoS Charge Estimate: £4.00/MWh**  
**Total Outturn: £5.31m**

# Daily Balancing Costs

■ BM Cost (Indicative)  
 ■ AS Cost (Estimate)

■ Energy Imbalance  
 ■ Positive Reserve (Op Res + STOR)  
 ■ Negative Reserve (Footroom)  
 ■ Frequency Control (Response + Fast Reserve)  
 ■ Other Reserve (Ancillary Costs Only)  
 ■ Constraints (BM & Trades only)  
 ■ Other (Reactive + Black Start + BM & AS General)

## Commentary

The market was mainly long with intermittent short periods throughout the day. There were no Trades required for Margin. BM Actions managed thermal export constraints in the East of England and Scotland in the evening. BM Actions were supporting overnight Voltage Control.
