### Commentary

The market was short between 5am and 8am in the early morning, and from the early afternoon to the evening period. Interconnector Trades were required for Downward Regulation overnight. 300MW of Non-BM Fast Reserve was run over the evening Darkness Peak. Trades and BM Action supported overnight Voltage Control. BM Action required for System Inertia overnight into the start of the day. BM Action managed thermal export constraints in Scotland mainly during the morning to early evening period.
