Commentary

The market was short over the morning to early evening, and from late night onwards. Interconnector Trades were required between 3am and 7am, and from 11pm for Downward Regulation. Trades were also secured for Response for the early hours of the morning. Overnight Trades and BM Action supported Voltage Control. BM Action overnight assisted System Inertia. BM Action alleviated thermal export constraints in the North of Scotland and the North of England at the start of the day and throughout the day. BM Action managed thermal export constraints in the Wales area during the late afternoon.
