

Date: Saturday 30 Oct 2021

BSUoS Charge Estimate: £6.20/MWh  
Total Outturn: £6.82m

Daily Balancing Costs

BM Cost (Indicative)  
AS Cost (Estimate)

Commentary

The market was short in excess of 1800MW in the evening. Multiple trades on the interconnectors were required over the darkness hours for downward regulation. In the morning, large volume of BM actions were required to buy off wind generation to solve power flow congestions in Scotland due to high wind levels. Overnight, a mix of trades and BM actions were required to manage the voltage levels in England. BM actions were also taken for RoCoF.
