BSUoS Charge Estimate: £3.21/MWh
Total Outturn: £3.04m

Daily Balancing Costs

- BM Cost (Indicative)
- AS Cost (Estimate)

Western Link status: Available

Commentary

The market was mostly short until 7am and changed to a long position until approximately 4:30pm.

A small number of units were run overnight for voltage support and then kept through the morning for Inertia. Overnight trades were also carried out for RoCoF. A combination of trades and BM Actions were required for voltage control.
