**I wish my response to be:**

(Please mark the relevant box)

☒ Non-Confidential☐ Confidential

*Note: A confidential response will be disclosed to the Authority in full but, unless agreed otherwise, will not be shared with the Panel or the industry and may therefore not influence the debate to the same extent as a non-confidential response.*

**For reference the Applicable CUSC (charging) Objectives are:**

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*

- c. *That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees' transmission businesses;*
- d. *Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency \*; and*
- e. *Promoting efficiency in the implementation and administration of the system charging methodology.*

**\*\*The Electricity Regulation referred to in objective (d) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.**

**Please express your views in the right-hand side of the table below, including your rationale.**

Standard Code Administrator Consultation questions		
1	Please provide your assessment for the proposed solution against the Applicable Objectives?	<div>Mark the Objectives which you believe the proposed solution better facilitates:</div> <div> <div>Original</div> <div><input type="checkbox"/>A <input type="checkbox"/>B <input type="checkbox"/>C <input type="checkbox"/>D <input type="checkbox"/>E</div> </div> <div>None. Industry has determined that a combination of 15 months is appropriate. This reduces that combination and not for the benefit of the end consumer. When raising the modification there was increased risk of having to reopen prices but this risk is now not at the same level</div>
2	Do you have a preferred proposed solution?	<div> <input type="checkbox"/>Original  <input checked="" type="checkbox"/>Baseline  <input type="checkbox"/>No preference </div> <div>Click or tap here to enter text.</div>
3	Do you support the proposed implementation approach?	<div> <input checked="" type="checkbox"/>Yes  <input type="checkbox"/>No </div> <div>Click or tap here to enter text.</div>
4	Do you have any other comments?	Throughout the modification process no clear benefits to the end consumer have been stated and presented so its slightly disappointing that this modification has made it through the whole process
