

Code Administrator Consultation Response Proforma

CMP403: Introducing Competitively Appointed Transmission Owners & Transmission Service Providers (Section 14)

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to cusc.team@nationalgrideso.com by **5pm on 29 April 2024**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration.

If you have any queries on the content of this consultation, please contact Milly Lewis Milly.Lewis@nationalgrideso.com or cusc.team@nationalgrideso.com

Respondent details	Please enter your details	
Respondent name:	Alana Collis	
Company name:	ESO	
Email address:	alana.collis-dugmore@nationalgrideso.com	
Phone number:	07843 804628	
Which best describes your organisation?	<input type="checkbox"/> Consumer body <input type="checkbox"/> Demand <input type="checkbox"/> Distribution Network Operator <input type="checkbox"/> Generator <input type="checkbox"/> Industry body <input type="checkbox"/> Interconnector	<input type="checkbox"/> Storage <input type="checkbox"/> Supplier <input checked="" type="checkbox"/> System Operator <input type="checkbox"/> Transmission Owner <input type="checkbox"/> Virtual Lead Party <input type="checkbox"/> Other

I wish my response to be:
 (Please mark the relevant box)

- Non-Confidential** (*this will be shared with industry and the Panel for further consideration*)
- Confidential** (*this will be disclosed to the Authority in full but, unless specified, will not be shared with the Panel or the industry for further consideration*)

For reference the Applicable CUSC (charging) Objectives are:

- a. *That compliance with the use of system charging methodology facilitates effective competition in the generation and supply of electricity and (so far as is consistent therewith) facilitates competition in the sale, distribution and purchase of electricity;*
- b. *That compliance with the use of system charging methodology results in charges which reflect, as far as is reasonably practicable, the costs (excluding any payments between transmission licensees which are made under and accordance with the STC) incurred by transmission licensees in their transmission businesses and which are compatible with standard licence condition C26 requirements of a connect and manage connection);*

- c. That, so far as is consistent with sub-paragraphs (a) and (b), the use of system charging methodology, as far as is reasonably practicable, properly takes account of the developments in transmission licensees’ transmission businesses;
- d. Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency *; and
- e. Promoting efficiency in the implementation and administration of the system charging methodology.

**The Electricity Regulation referred to in objective (d) is Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (recast) as it has effect immediately before IP completion day as read with the modifications set out in the SI 2020/1006.

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions						
1	Please provide your assessment for the proposed solution against the Applicable Objectives?	Mark the Objectives which you believe the proposed solution better facilitates:				
		<table border="1"> <tr> <td>Original</td> <td><input type="checkbox"/>A</td> <td><input type="checkbox"/>B</td> <td><input checked="" type="checkbox"/>C</td> <td><input type="checkbox"/>D</td> <td><input checked="" type="checkbox"/>E</td> </tr> </table> <p>C: The conclusion of an early competition tender process will result in a preferred bidder. This party will accede to the codes and be awarded a licence by Ofgem. There will be new licence conditions for the existing TOs to co-operate with CATOs, and updates to other codes including the STC to facilitate this.</p> <p>E: The Electricity Act 2023 contains legislation to enable competition in onshore electricity transmission. Secondary regulations will also be in place to support this and updates to Licence conditions. This modification is to provide the required charging provision to reflect this forthcoming CATO regime.</p>	Original	<input type="checkbox"/> A	<input type="checkbox"/> B	<input checked="" type="checkbox"/> C
Original	<input type="checkbox"/> A	<input type="checkbox"/> B	<input checked="" type="checkbox"/> C	<input type="checkbox"/> D	<input checked="" type="checkbox"/> E	
2	Do you have a preferred proposed solution?	<input checked="" type="checkbox"/> Original <input type="checkbox"/> Baseline <input type="checkbox"/> No preference				
		ESO prefers the original proposed solution.				
3	Do you support the proposed implementation approach?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No				
		ESO supports the agreed implementation approach.				

4	Do you have any other comments?	This modification forms part of a suite of modifications across the Codes to enable implementation of Early Competition through the CATO regime.
