Code Administrator Meeting Summary

Meeting name: Application of Gate 2 Criteria to existing contracted background (Workgroup 12)

Date: 23/07/2024

Contact Details

Chair: Catia Gomes, ESO Code Administrator

Proposer: Alice Taylor, ESO (CMP435), Steve Baker, ESO (CM096)

Key areas of discussion

The key area for discussion in Workgroup 12 was to review the Workgroup Consultation. The Chair noted quoracy and began the Workgroup.

Actions

The Chair proposed to close Action 49 and there were no objections from the Workgroup.

Terms of Reference

A Workgroup member queried whether the Workgroup Consultation will describe how the terms of reference have been met. The Chair responded the Workgroup Report and discussions post Consultation will cover this off.

Workgroup Consultation review

The Chair led the Workgroup through a review of the Proposer's solution section of the Workgroup Consultation.

A Workgroup member suggested lifting some wording from the CMP434 Consultation and placing it in the CMP435 Consultation with further text explaining the difference between the modifications. A Workgroup member voiced their concerns including text from the CMP434 Consultation could cause respondents to respond on CMP434 matters. An ESO SME agreed to include different colour text to explain the difference for ease.

Some Workgroup members believed the Workgroup discussions section should include elements of the solution to give context to the reader. The Chair advised that the structure of the document was to separate solution from discussion but noted that the Workgroup discussion section did contain links to relevant sections of the solution text above it (for easy reference).

Workgroup members worked through the sections of the Workgroup Consultation with suggestions to reword text in places for clarity.

Next Steps

The next Workgroup on 24 July will be continue reviewing the CMP434 Workgroup Consultation document and also review the CM096 Workgroup Consultation document to be ready for the Workgroup Consultations to go live.
